ABOUT US

A Brief Story About The Company

At BEAL Construction, we think beyond limits Driving operational excellence, sustainable growth, and trusted partnerships. The value we create for our clients lies in our ability to provide cost-effective solutions that save money while ensuring every Rand spent contributes to building assets that deliver a strong return on investment. Specializing in comprehensive construction and project implementation services, we consistently deliver quality work for stable, long-term clients while shaping success together.”

GET TO KNOW US

BEAL Construction is a trusted partner in construction and project delivery, dedicated to strong relationships and community upliftment. As a proud B-BBEE Level 3 contributor, we're committed to transformation, inclusivity, and innovation. We deliver affordable, high-quality work that adds lasting value, embrace technology for sustainable growth, and invest in our team's development. With operational excellence, cost-effective solutions, and a client-first approach, BEAL Construction builds enduring success for all partners and stakeholders.

Our Aspiration

Empowered teams. Driving innovation. Delivering expert, affordable quality.

“We aspire to lead with integrity—building strong partnerships, embracing innovation, uplifting communities, and delivering sustainable, high-quality solutions that create lasting success for clients and stakeholders.”

Our Approach

At BEAL Construction, we focus on excellence, trust, and sustainability. We deliver affordable, high-quality solutions that create lasting value, empower local communities, and promote growth. Through innovation, technology, and continuous skills development, we ensure operational excellence and strong, long-term partnerships.

Our Expertise

BEAL Construction provides expert services in civil construction, hydro mining, project management, tailings deposition, TSF design, and environmental rehabilitation. Driven by innovation and sustainability, we deliver cost-effective, high-quality solutions that ensure safety, efficiency, and long-term value for our clients across industries.

SERVICES

Civil Construction

BEAL Construction deliver robust, cost-effective infrastructure projects with precision and excellence, ensuring long-lasting value and sustainable development for our clients.

Hydro Mining

Our hydro mining solutions maximize efficiency, minimize risk, and deliver safe, innovative methods tailored to optimize resource recovery and environmental protection.

Project Management

BEAL Construction provide complete project lifecycle management, ensuring seamless coordination, cost control, quality assurance, and timely delivery of client-focused outcomes.

Tailings Deposition

Our expertise ensures controlled, safe, and sustainable tailings deposition practices, protecting environments while optimizing long-term operational performance and compliance standards.

TSF Design & Construct

BEAL Construction specialize in designing and constructing resilient Tailings Storage Facilities, combining innovation, safety, compliance, and sustainability to meet evolving client and industry needs.

Environmental Rehabilitation

BEAL Construction restore and rehabilitate degraded environments using sustainable practices, ensuring compliance, ecological balance, and long-term environmental and community benefits.

WHY CHOOSE US

Trusted Partner

We build lasting relationships through reliability, transparency, and excellence.

Affordable Quality

Delivering cost-effective solutions without compromising on quality.

Broad Expertise

Specialists in civil construction, hydro mining, project management, TSF design, tailings deposition, and environmental rehabilitation.

Community Focused

Proud BEE Level 3 contributor, uplifting local communities through partnerships and involvement.

Innovation & Growth

Embracing technology, diversification, and forward-thinking approaches to ensure sustainability.

Skilled Workforce

Developing and empowering our employees to deliver operational excellence and client success.

MANAGEMENT

Marius Le Roux

Managing Director

Analytical and results-driven professional with over a decade of experience in project management and quality control within mechanical and industrial engineering. Skilled in cost optimisation, resource planning, and CAD design, with a focus on technical expertise, rational decision-making, and collaboration to drive business growth, innovation, and lasting client relationships.

Chris Jankowitz

Director Tailings

As Director of Beal Construction, I lead complex projects from planning to completion, ensuring efficiency, safety, and quality. Skilled in logistics, budgeting, and stakeholder engagement, I empower teams through strong leadership, clear goals, and collaboration. My expertise ensures projects are delivered on time, within budget, and to exceptional standards.

Arno van der Merwe

Non-Executive - Group CEO

Visionary leader with 20+ years of international experience in civil and structural engineering, project management, and forensic auditing. Skilled in empowering teams, setting clear goals, and delivering projects across commercial, residential, industrial, and energy sectors. Expert in design, foundations, tailings, and gas storage, with proven success in turnkey and EPCM projects.

Conrad Knoetze

Director Re-mining

Accomplished Director with 20+ years' experience in mining and civil construction, specialising in tailings, hydro-mining, and infrastructure. Combines strong technical expertise in project management, cost control, and SHEQ compliance with proven leadership in building high-performing teams. Recognised for delivering innovative, large-scale projects that exceed client expectations and drive sustainable success.

André Myburg

Director Civils

André, Director of BEAL Construction, holds a Project Management qualification from North-West University. His career spans major civil and mining projects nationwide, including bridges, dams, and tailing facilities. Renowned for technical expertise, integrity, and innovative solutions, he consistently delivers excellence, strengthening BEAL's reputation as a trusted industry leader.

Jacques Van Wyk

Non-Executive - Group CFO

Branded as an authentic relationship builder, I combine analytical risk, finance, and human capital management with an optimistic vision. With persuasive leadership and strategic foresight, I energise teams, drives profitability, and fosters innovation. Over a decade of experience across Africa and Australia underpins my commitment to ethical, sustainable, and results-driven growth.

WHAT CLIENTS SAY

"Beal Construction proved to be a reliable and professional partner on our TSF Dam 2 project. Their expertise, timely delivery, and innovative solutions ensured excellent results. We strongly recommend their services."

Diana Hu
CEO, Cheetah Chrome

"Beal Construction delivered our EWD Silt Trap project with expertise, reliability, and excellent results. A trusted partner to Eastplats for over four years."

W Yang
CEO: SA Operations, Eastplats

"Beal Construction delivered excellent results in our TSF Deposition Management project, combining expertise, adaptability, and a strong safety record. A truly reliable and professional partner."

Kunju Wang King
Client Representative, Cheetah Chrome

I highly recommend Beal Construction (Pty) Ltd. for Waste Disposal Facility and related projects. Over seven months, they delivered Stage 3 of our Hazardous Waste Disposal Facility on time, to high standards, with expertise and reliability. Their professionalism, problem-solving, and results made them an outstanding project partner.

Jacques Van Niekerk
SHEQ Manager / Project Manager, Samancor, Tubatse Ferrochrome

"Beal Construction showed outstanding commitment and adaptability during our TSF Hydro Mining project at Cheetah Chrome Mine. Their expertise, safety record, and professionalism delivered excellent results. I strongly recommend them for future hydro mining operations."

Kunju Wang King
Client Representative, Cheetah Chrome
